Snow Emergency Lifted Notice

Date: February 26, 2026

Effective Time: 12:00 PM

The Borough of Modena hereby announces that the previously declared Snow Emergency is lifted, effective immediately.

While the formal Snow Emergency designation is no longer in effect, residents are advised to continue exercising caution when traveling throughout the Borough. Although most ice has melted and temperatures are expected to rise, some areas may still present slippery conditions, particularly in shaded locations, along curbs, and near drainage areas.

Roadways remain narrowed in certain locations due to snow accumulation along grassy and curbside areas. With warmer temperatures and forecasted rain, residents should remain mindful of possible ponding of water and minor localized flooding, particularly in low-lying areas and near the Brandywine Creek.

The lifting of the Snow Emergency does not eliminate the need for careful travel. Residents are encouraged to remain alert and use good judgment as conditions continue to improve.

Borough Public Works will continue monitoring roadways and drainage areas as needed.

Please continue to follow official Borough communication channels for updates.

Authority:

Christina Puff
Mayor, Borough of Modena
